Frontend Developer with experience working with React and Angular. Worked in international startups and with small business, used to fast-paced environment, know how to take responsibility for my work. Now looking for my next challenge as a frontend developer in Israel.

Skills

Programming JavaScript, TypeScript, React, Angular, NextJS, Redux, RxJs, SCSS, CSS-in-JS, Git

Design Figma, Webflow, Framer, Adobe Illustrator, Miro

Communication English, Russian, Hebrew

Experience

Frontend Engineer, Ace — AI Copilot for engineering managers, US (remote) — 2021-2022

- Greatly simplified usage workflows for large teams by implementing project permissions and team management modules with **RxJS** and **Akita**
- Streamlined UI development by refactoring project from global styles to design system with new **adaptive layout components**.
- General business logic development: data fetching and transformation with **RxJs** and **TypeScript**, working with **REST API**, working with roaming and role-based access system with **TypeScript**
- UI development with strong focus on accessibility, performance and Lighthouse reports. We used **Storybook** with custom components, **PrimeNG** and **SCSS**.
- Mentored junior colleagues in **1:1 format**

Frontend Developer, Freelance – 2019-2021

- Migrated projects to **TypeScript** and refactored React projects from class components to function components, making it much easier to maintain and update the web app.
- Migrated e-commerce store from client-side React app to **server-side NextJS** with **TypeScript** and **Tailwind CSS**, significantly increasing loading speed and Time-to-interactive.
- Created design systems in **Figma** and **Storybook** with focus on accessibility, and performance

Education

BA in International Relations — Tomsk State University, 2012—2016

MA in Public Policy — HSE University, Moscow, 2016—2018
